About

UXUI-focused Product Designer with experience designing data and AI-driven digital tools for business and operations teams. Skilled in translating comprehensive user workflows into decision-support dashboards, scalable design systems, and intuitive interfaces. Experienced in conducting extensive user research, business documentation, and end-user testing from discovery to delivery.

Experience

Fraser Health Authority
UX/UI Designer
Aug 2024 - Present

As a designer, I've led UX initiatives across multiple healthcare streams, designing dashboards and decision support tools used by operational and leadership teams. I've supported projects like the integration of ThoughtSpot, and redesigned an Emergency Wait Times platform to improve clarity and trust in site wait-times. By engaging with stakeholders and supporting development teams, I applied design and business strategies that enhanced the patient and provider experience.

Fraser Health Authority
Junior UX/UI Designer (Co-op)
Jan 2024 - Aug 2024

Assisted senior UX designers in creating user-focused solutions and dashboards for healthcare projects, sharing ideas on design consistency and usability. Supported the design of different pages on the Advance Analytics Platform. Collaborated with development teams while gaining hands-on experience in UX best practices, stakeholder engagement, and data-driven design strategies.

Simon Fraser University
Segal School
Digital Media Assistant (Co-op)
Aug 2022 - Dec 2022

Gained hands-on experience in a fast-paced technical environment, where efficiency was critical to ensuring smooth graduate program delivery. Collaborated with the course-delivery team to design and develop Canvas course modules, enhancing the overall learning experience.

Precision NanoSystems Inc.
Graphic Designer (Co-op)
May 2021 - Dec 2021

Designed marketing assets for PNI's social media channels to promote conferences, products, and brand initiatives. Collaborated with researchers and the product manager to design a user-guide for The NanoAssemblr GMP System. Also created posters and packaging for various products, with clarity and visual appeal.

Freelance
Designer
May 2019 - Aug 2025

Delivered end-to-end design solutions, working directly with clients to define requirements and timelines, including Arrow Physiotherapy, Three Pillars Basketball, MISL Hoops, and more. Delivered branding, marketing assets, and digital content tailored to each client's unique goals, ensuring strong visual identity and engagement.

Education

Bachelor of Arts - UX Design
Simon Fraser University
Sept 2018 - May 2024
