American & Canadian Citizen

PROFESSIONAL SUMMARY

Results-driven UX/UI Product Designer with experience designing data-driven digital tools and AI-powered dashboards for healthcare operations and leadership teams. Proven track record translating complex user workflows into scalable design systems and decision-support interfaces that measurably improve provider efficiency and patient experience. Experienced the full product lifecycle from stakeholder discovery and user research to prototype delivery and development handoff.

PROFESSIONAL EXPERIENCE

UX/UI Designer | Fraser Health Authority

Aug 2024 – Present

One of BC's largest health authorities, serving 1.9M+ residents across 13 municipalities.

- Led UX design across 4+ concurrent healthcare data portfolios, producing dashboards and decision-support tools used daily by 200+ operational and leadership staff.
- Redesigned the Emergency Wait Times platform, improving data clarity and stakeholder trust — contributing to a 20% reduction in patient dissatisfaction queries related to site wait-time accuracy.
- Spearheaded integration of the ThoughtSpot analytics platform, partnering with data engineering to assess usability and reduce the time-to-insight for data requests from a few hours to under 30 minutes.
- Integrated and worked with a scalable design system (Figma component library) adopted across 3 product teams, reducing UI inconsistencies by an estimated 40% and cutting new-screen design time by ~30%.
- Facilitated 15+ stakeholder workshops and user interviews to define requirements, document workflows, and validate prototypes prior to development handoff.

Junior UX/UI Designer (Co-op) | Fraser Health Authority

Jan 2024 – Aug 2024

- Supported senior designers on the Advance Analytics Platform, contributing to 6+ page designs showcasing data visualization and reporting modules used by health authority planners.
- Collaborated daily with cross-functional development teams, ensuring design specs were implemented accurately and reducing design-to-dev revision cycles by approximately 25%.
- Proposed and implemented design consistency improvements across components, helping establish early patterns later adopted into a full UI kit.
- Participated in usability testing sessions and synthesized findings into actionable recommendations that informed 3 major design iterations.

Digital Media Assistant (Co-op) | SFU Segal School of Business

Aug 2022 – Dec 2022

- Designed and developed 8+ Canvas LMS course modules for graduate-level programs, improving content accessibility and learner navigation for 500+ enrolled students per term.
- Worked directly with the course-delivery team in a fast-paced production environment, troubleshooting technical issues and providing hasty equipment assistance.

Graphic Designer (Co-op) | Precision NanoSystems Inc. (PNI)

May 2021 – Dec 2021

- Designed the user guide for the NanoAssemblr GMP System — a regulated medical device — collaborating with research scientists and the product manager to translate complex technical workflows into clear, accessible documentation.

- Produced marketing assets for PNI's social media and conference channels, supporting product launches and brand awareness campaigns reaching an audience of 10,000+ biotech professionals.
- Created product packaging and poster designs for 3 product lines, balancing regulatory clarity requirements with visual appeal.

Freelance Designer | Independent — Multiple Clients

May 2019 – Aug 2025

Concurrent with full-time roles. Select clients: Arrow Physiotherapy, Three Pillars Basketball, MISL Hoops.

- Delivered end-to-end branding, marketing, and digital design for 3+ clients, defining requirements, timelines, and deliverables independently.
- Built and launched brand identity systems for 2 sports organizations, including logo suites, social templates, and digital content — each achieving consistent brand application across all channels, enhancing their brand awareness and customer engagement.

EDUCATION

Bachelor of Arts — UX Design

Sept 2018 – May 2024

Simon Fraser University, Vancouver, BC

SKILLS & TOOLS

UX/UI Design: Product Design, Design Systems, Wireframing & Prototyping, Information Architecture, Brand Design

Research & Strategy: User Research, User Interviews, Usability Testing, A/B Testing, Stakeholder Workshops, Documentation

Data & AI Tools: PowerBI, Data Visualization, Dashboard Design, Decision-Support Interface Design, Claude Code, Cursor, Figma Make

Development: Python, HTML/CSS, TypeScript

Design Tools: Figma, FigJam, Adobe XD, ProtoPie, Miro, Adobe Illustrator, Adobe Photoshop, Adobe InDesign

3D & Render: Blender, Maya, Adobe Substance Painter, Arnold Render
